

# Preqin Product Update:

## Infrastructure Online

December 2011

Welcome to Preqin Infrastructure Online Product Update, our subscriber-only newsletter. This month we are delighted to inform you about a number of major improvements to your Infrastructure Online service including revamped fund and fund manager profiles, and a complete upgrade to our infrastructure deals database.

Infrastructure Online has detailed profiles for over 1,300 investors actively investing in infrastructure, over 300 infrastructure fund managers worldwide and over 500 infrastructure funds, as well as over 2,300 deal transactions involving these firms. The latest enhancement allows for easy access to all this information on each firm/fund profile – in other words, each profile now shows you:

- Background to the firm, addresses and key contact people;
- Assets under management, strategy and investment criteria;
- Details for each fund managed by the firm – size, strategy, sample investors, etc;
- Law firms and placement agents used;
- Performance data when available – net IRRs and multiples;
- Deals completed by the firm/fund;
- Sample investors.

**Elliot Bradbrook**  
Manager, Infrastructure

### The 2011 Preqin Infrastructure Review

The most comprehensive examination of the unlisted infrastructure asset class ever produced.

Premium subscribers, or those with access to the Preqin infrastructure deals database, will notice a number of new additions and upgraded features. Fund manager profiles are now more defined, listing portfolio assets, service providers used and known co-investors. We have also added a number of filters and download features not previously available to boost functionality. Other new features include:

- Service provider profiles – search and view those financial advisors, debt providers and law firms involved in deals alongside infrastructure fund managers.
- Co-investor profiles – search and view those firms co-investing alongside infrastructure fund managers by industry, project stage and geographic location.
- Infrastructure fund manager and service provider league tables.
- A refined and improved advanced search feature.

(These features require you to have access to the relevant modules of data – but even if you don't, you'll still be able to view pages of sample data so you can see what's available.) More than ever, Infrastructure Online is simply the most detailed and comprehensive information resource on the private infrastructure fund market globally, and is a unique resource to help you in your business.

I hope that you like these enhancements to the service when you log in and have a look – I think you will! – and as always please feel free to get in touch and let us know of any feedback you may have or suggestions for future upgrades.

**Looking for more information?** If you would like us to update any of the company profiles on our database, or look into a company which is not currently listed, please let me know:
