

PREQIN 2019 GLOBAL PRIVATE DEBT LEAGUE TABLES

Secured **\$13.0bn** in June 2018

\$38.0bn raised in the past 10 years

Current allocation of **\$17.6bn**

INSIDE THE LEAGUE TABLES

Preqin's 2019 Global Private Debt League Tables use data from Preqin Pro to rank and highlight the most influential players in the industry. In an Excel download, we reveal the top performing funds, most consistent performing managers, largest investors in the asset class and more.

Mezzanine funds accounted for 28% of all private debt capital secured in 2018 – up from 10% in 2017 – driven by Goldman Sachs Merchant Banking Division's GS Mezzanine Partners VII which secured \$13bn. Investors have looked for experience when allocating to private debt in 2018, but some first-time fund managers have successfully attracted capital despite the lack of track record: IbaCore Capital's first offering, Albacore Partners I, surpassed its fundraising target to close in April 2018 on €1.5mn. Private equity fund of funds manager Partners Group holds the largest current allocation to private debt at \$17.6bn.

US-based fund managers dominate the largest firms by private debt capital raised over the past 10 years, with Oaktree Capital Management ranking highest having secured \$38bn.
